BVF™ Bacterial/Viral Filters

- Single use filters for effective removal of bacteria, viruses and expectorated matter
- Suitable for inspiratory and expiratory spirometry testing
- Protects the subject against cross-infection
- Protects the spirometer against cross-contamination
- Validated 99.99% cross-contamination efficiency for both bacteria and viruses
- Very low expiratory flow impedance
- Low effective dead space of 65ml as required for lung volume and DLCO testing
- Efficient at high flow rates
- Attractively priced

Code:	Colour:	To fit spirometers from:
28350	Blue  (Small Mouthpiece)	Vitalograph, MIR, Micro Medical and most office spirometers
28362	White 	Most Lab PF Equipment, including Sensormedics, PK Morgan, Ganshorn (new)
28363	Clear 	Jaeger/VIASYS/Carefusion PF Lab Equipment
28365	Teal 	MedGraphics PF Lab Equipment
28375	Grey 	Chest, Fukuda, Minato
28368	Green 	Ferraris/nSpire/PDS/KoKo
28401	Translucent  (Fits Syringe)	Most office spirometers, including Vitalograph, Medisoft, Cosmed, MIR, Micro Medical, ZAN, H.R and other applications

Unlike barrier filters which trap expectorated matter whilst allowing viruses and bacteria to pass through, Vitalograph filters use an electrostatically charged material that traps expectorated matter plus bacteria and viruses for highly effective protection against cross-contamination.

In addition to the hygiene benefits of using bacterial viral filters they also support productivity in pulmonary function testing by reducing the time spent cleaning and decontaminating test equipment.

Pulmonary Function Test Kits

- Complete pulmonary function test kits for use with laboratory lung function analysers and office spirometers
